ABOUT ME

Data scientist & AI Engineer passionate about turning data into intelligent solutions that create real-world impact, building end-to-end ML systems, analytics platforms and AI-powered applications.

I thrive at the intersection of data, code and creativity, delivering measurable results across finance, education, sports and technology.

CORE STRENGTHS

- Product-Minded Problem Solver
- End to End ML & AI Solution Builder
- Strong Analytical Foundation
- Clean, Scalable & Maintainable Code Fast
- Learner & Highly Collaborative
- Committed to Continuous improvement

TECHNICAL SKILLS

- Programming & Query**
Python, SQL, JavaScript, HTML/CSS
- Data & Analytics**
Pandas, NumPy, SciPy, Excel, Power BI, Matplotlib, EDA, Statistics
- Machine Learning & AI**
scikit-learn, XGBoost, LightGBM, TensorFlow, Keras, PyTorch, SHAP
- NLP & Computer Vision**
Transformers, NLTK, OpenCV, MTCNN, MobileNetV2
- Databases & Backend**
PostgreSQL, MySQL, SQLite, SQLAlchemy, REST APIs, Auth, RLS
- Tools & Platforms**
Git, GitHub, Jupyter, Colab, Streamlit, Flask, React

EDUCATION

Bachelor of Science in Data Science (In Progress)
KCA University, Kenya
Expected Graduation: 2027

CERTIFICATIONS

- AI Engineering (Martial Jenga school of IT)
- Data Fundamentals (IBM-SkillsBuild)
- Power Bi (Uniathena)
- Data Science with python (Udemy)
- Data Analysis with Python/Excel (Uniathena)

PROFESSIONAL SUMMARY

Data Science undergraduate and aspiring Data scientist & AI Engineer with hands-on experience building machine-learning systems, predictive analytics applications and intelligent data products. I specialize in transforming raw data into actionable insights and scalable solutions that drive efficiency, growth and innovation.

WHAT I BRING TO COMPANIES

Data-Driven Impact

I turn complex data into clear insights that drive measurable business outcomes.

Scalable AI Solutions

I build reliable, scalable ML/AI systems that solve real problems and improve efficiency.

Innovation & Automation

I automate workflows, reduce manual effort and help teams focus on what matters most.

Collaborative Partner

I communicate clearly, work cross-functionally and deliver solutions that create value.

SELECTED PROJECTS

01

FORMULA 1 PREDICTOR 2026

Probabilistic Forecasting & Monte Carlo Engine

Race prediction system using 10,000+ Monte Carlo simulations, ELO ratings, weather and grid-penalty modeling with calibration and backtesting.

Tech: Python, NumPy, scikit-learn, XGBoost, Monte Carlo, ELO, Flask, Plotly

02

CREDIT WORTHINESS ASSESSMENT TOOL

Explainable Credit-Risk & Responsible AI Application

Credit-risk prediction system using gradient-boosting models with SHAP explanations and fairness analysis across protected groups.

Tech: Python, Flask, XGBoost/LightGBM, SHAP, SQL, Responsible AI

03

MEVEST AFRICA VAULT

Real-Time Financial Portfolio Intelligence Platform

Multi-asset investment platform with real-time data sync, portfolio analytics and AI tool-calling workflows for smarter investment insights.

Tech: React, TypeScript, PostgreSQL, Supabase, RLS, REST APIs, AI APIs

INDUSTRIES I CREATE IMPACT IN

Fintech & Finance

Data driven Businesses.

Education

Sports Analytics

Healthcare

E-commerce

WHAT DRIVES ME

- Solving meaningful problems with data & AI
- Building products that people love to use
- Learning continuously and staying ahead
- Creating a positive impact through tech

MY JOB EXPERIENCE

OMNISENSE GLOBAL

I am the co-founder of Omnisense Global an IOT startup based in Kenya.

DATA SCIENCE KCA CLUB LEAD

Throughout my first two years of the university, I took part in sharing data science and analysis knowledge to my fellow students.

"Turning Data Into Decisions. Building Intelligence Into Impact."
