ABOUT ME

I'm a passionate Data Scientist & AI Engineer who loves turning complex data into real-world solutions that solve problems and create value.

I combine strong analytical thinking with clean code to build intelligent systems, predictive models and data products that drive measurable impact across different industries.

Curious, collaborative and driven by continuous learning, I thrive in fast-paced environments where innovation and data make a difference.

PROFESSIONAL SUMMARY

Data Science undergraduate and aspiring Data & AI Engineer with hands-on experience building machine-learning systems, predictive analytics applications and intelligent data products.

I specialize in transforming raw data into actionable insights and scalable solutions using modern ML, AI and data engineering practices.

WHAT I BRING TO COMPANIES

Data-Driven Impact

I turn complex data into clear insights that drive measurable business outcomes.

Scalable AI Solutions

I build reliable, scalable ML/AI systems that solve real problems and improve efficiency.

Innovation & Automation

I automate workflows, reduce manual effort and help teams focus on what matters most.

Collaborative Partner

I communicate clearly, work cross-functionally and deliver solutions that create value..

CORE STRENGTHS

- ✓ Problem Solver with a Product Mindset
- ✓ End-to-End ML & AI Solution Builder
- ✓ Strong Analytical & Statistical Foundation
- ✓ Clean Code, Scalable & Maintainable Systems
- ✓ Fast Learner, Adaptable & Collaborative
- ✓ Passionate about Continuous Improvement

MY JOB EXPERIENCE

OMNISENSE GLOBAL

I am the co-founder of Omnisense Global an IOT startup based in Kenya.

DATA SCIENCE KCA CLUB LEAD

Throughout my first two years of the university, I took part in sharing data science and analysis knowledge to my fellow students.

SELECTED PROJECTS (3)

FORMULA 1 PREDICTOR 2026

Probabilistic Forecasting & Monte Carlo Engine

Built a race prediction system using 10,000+ Monte Carlo simulations, Elo ratings, weather, safety-car scenarios and driver form to generate accurate probabilities. Implemented calibration, backtesting and feature-level explanations.

Tech: Python, NumPy, scikit-learn, XGBoost, Monte Carlo, Elo, Flask, Plotly

CREDIT WORTHINESS ASSESSMENT TOOL

Explainable Credit-Risk & Responsible AI Application

Developed a credit-risk prediction system using gradient-boosting models with SHAP-based explanations and decision auditing. Performed fairness analysis across protected groups to ensure ethical, unbiased model behavior.

Tech: Python, Flask, XGBoost/LightGBM, SHAP, SQL, Responsible AI

MEVEST AFRICA VAULT

Real-Time Financial Portfolio Intelligence Platform

Built a multi-asset investment platform with real-time data sync, portfolio analytics and secure user data management. Integrated external market data and AI tool-calling workflows to deliver smarter investment insights.

Tech: React, TypeScript, PostgreSQL, Supabase, RLS, REST APIs, AI APIs

TECHNICAL SKILLS

Programming & Query

Python, SQL, JavaScript, TypeScript, HTML, CSS

Data & Analytics

Pandas, NumPy, SciPy, Excel, Power BI, Matplotlib, Seaborn, Plotly, EDA, Statistics, Hypothesis Testing, Time-Series Analysis

Machine Learning & AI

scikit-learn, XGBoost, LightGBM, CatBoost, TensorFlow, Keras, PyTorch, Optuna, SHAP, Ensemble Learning, Forecasting, Model Evaluation

NLP & Computer Vision

Transformers, NLTK, TF-IDF, Embeddings, Similarity Search, LLM APIs, AI Agents, OpenCV, MTCNN, MobileNetV2, Face Detection, Matching

Databases & Backend

SQL, PostgreSQL, MySQL, SQLite, SQLAlchemy, Supabase, FastAPI Concepts, REST APIs, Authentication, Validation, RLS, Security

Tools & Engineering

Git, GitHub, Jupyter, Google Colab, Docker (Basics), Streamlit, Flask, Gradio, API Integration, CSRF Protection, Rate Limiting

EDUCATION

Bachelor of Science in Data Science (In Progress)

KCA University, Kenya

Expected Graduation: 2027

CERTIFICATIONS

- Machine Learning Specialization (Coursera)
- Deep Learning Specialization (Coursera)
- Google Data Analytics Professional
- Certificate SQL for Data Science (Coursera)
- Data Visualization with Python (Coursera)

WHAT DRIVES ME

- ✓ Solving meaningful problems with data & AI
- ✓ Building products that people love to use
- ✓ Learning continuously and staying ahead
- ✓ Creating a positive impact through technology

I'M BEST WHEN

- ✦ Turning complex data into simple, actionable insights
- 🔍 Building end-to-end ML/AI solutions that scale
- 👤 Collaborating with teams to deliver real impact
- 🔧 Working in fast-paced and innovative environments

LET'S CONNECT

I'm actively open to Data Science, Machine Learning, AI Engineering and Analytics opportunities where I can contribute, learn and grow while helping organizations turn data into decisions.

Open to Physical, Remote & International Opportunities

THE VALUE I DELIVER ACROSS INDUSTRIES

Fintech & Financial Services

Building ML models for risk scoring, fraud detection, algorithmic trading insights and customer analytics.

Healthcare

Creating predictive models for patient outcomes, resource optimization and data-driven decision support.

Retail & E-Commerce

Driving sales and customer experience through recommendation systems, segmentation and demand forecasting.

Education & EdTech

Developing intelligent learning tools, performance analytics and personalized learning experiences.

Sports Analytics

Analysing performance, predicting outcomes and uncovering insights that drive competitive advantage.

Business & Startups

Helping organizations make smarter decisions, automate workflows and build data-powered products.

More

WHAT SETS ME APART

Business First Mindset

I align every solution with real business goals and measurable impact.

End-to-End Ownership

From data to deployment, I own the entire lifecycle and ensure success.

Quality & Reliability

I build robust, scalable and secure solutions following best practices.

Clear Communicator

I translate complex data into clear insights for better decisions.

Continuous Learner

I stay ahead of emerging tech to deliver future-ready solutions.

THE IMPACT I CREATE

20+

ML & Data Projects

Delivered end-to-end solutions across industries.

95%+

Model Reliability

Focus on accuracy, robustness & performance.

300+

Hours saved

Through automation and data-driven optimization.

Data-Driven Decisions

Turning raw data into insights that drive growth.

Client-Centric Approach

Building long-term relationships through trust.

"I believe data has the power to solve real problems, improve lives and create a better future. I'm here to build that future with you."

Jackson Kimotho

Data Scientist & AI Engineer
